SPECIAL ISSUE

ARCHAEAN AND EARLY PROTEROZOIC GEOLOGY OF THE PILBARA REGION, WESTERN AUSTRALIA

Edited by
T.S. BLAKE[a] and A. MEAKINS[b]

[a]*Department of Geology, University of Western Australia, Nedlands, W.A. 6009, Australia*
[b]*CRA Exploration Pty. Ltd., 21 Wynyard Street, Belmont, W.A. 6104, Australia*

Preface vii
Sequence stratigraphy of the Archaean supracrustal belts of the Pilbara Block, Western Australia
B. Krapez (Nedlands, W.A., Australia) 1
Volcanic, sedimentary and tectonostratigraphic environments of the ~3.46 Ga Warrawoona Megasequence: a review
M.E. Barley (Nedlands, W.A., Australia) 47
Constraints on the age of the Warrawoona Group, eastern Pilbara Block, Western Australia
N.J. McNaughton (Nedlands, W.A., Australia), W. Compston (Canberra, A.C.T., Australia) and M.E. Barley (Nedlands, W.A., Australia) 69
Geochemistry of a silicified, felsic volcaniclastic suite from the early Archaean Panorama Formation, Pilbara Block, Western Australia: an evaluation of depositional and post-depositional processes with special emphasis on the rare-earth elements
R.L. Cullers (Manhattan, KS, USA), M.J. DiMarco (Baton Rouge, LA, USA), D.R. Lowe (Stanford, CA, USA) and J. Stone (Manhattan, KS, USA) 99
Origin of the 3500–3300 Ma calc-alkaline rocks in the Pilbara Archaean: isotopic and geochemical constraints from the Shaw Batholith
M.J. Bickle (Cambridge, UK), L.F. Bettenay (Nedlands, W.A., Australia), H.J. Chapman (Cambridge, UK), D.I. Groves, N.J. McNaughton (Nedlands, W.A., Australia), I.H. Campbell (Canberra, A.C.T., Australia) and J.R. De Laeter (Bentley, W.A., Australia) 117
Melting of Archaean sialic crust under high a_{H_2O} conditions: genesis of 3300 Ma Na-rich granitoids in the Mount Edgar Batholith, Pilbara Block, Western Australia
W.J. Collins (Newcastle, N.S.W., Australia) 151
3.1 Ga tuff from the Sholl Belt in the West Pilbara: further evidence for diachronous volcanism in the Pilbara Craton of Western Australia
R.C. Horwitz (Floreat Park, W.A., Australia) and R.T. Pidgeon (Bentley, W.A., Australia) 175
Late Archaean crustal extension, sedimentary basin formation, flood basalt volcanism and continental rifting: the Nullagine and Mount Jope Supersequences, Western Australia
T.S. Blake (Nedlands, W.A., Australia) 185
Genetic modelling for banded iron-formation of the Hamersley Group, Pilbara Craton, Western Australia
R.C. Morris (Wembley, W.A., Australia) 243
Carbonate sedimentology of the early Precambrian Hamersley Group of Western Australia
B.M. Simonson (Oberlin, OH, USA), K.A. Schubel (Baltimore, MD, USA) and S.W. Hassler (Santa Barbara, CA, USA) 287
Depositional history of the Main Tuff Interval of the Wittenoom Formation, late Archean–early Proterozoic Hamersley Group, Western Australia
S.W. Hassler (Santa Barbara, CA, USA) 337
